Statement GM Position Crude Oils, Meals & Hulls

Crude Oils, Meals & Hulls EMEA

- APPENDIX -

Crude Sunflower Oil / Crude High Oleic Sunflower Oil and Sunflower Meal feed

To the best of our knowledge there are no genetically modified sunflower seeds being grown anywhere in the world. Our sunflower oil and meal can therefore be regarded as conventional.

We take all necessary precautions to ensure the integrity of the conventional origin of raw materials and products during the production process.

Crude Rapeseed Oil / Crude High Oleic Rapeseed Oil and Rapeseed Meal feed Crude Soybean Oil and Soybean Meal feed

In view of EU Regulation (EC) 1829/2003 and 1830/2003 - for UK located facilities (*), we will refer to retained EU legislation, as amended until the issue date of the statement - on genetically modified food and feed and on the traceability and labelling of genetically modified organisms, we confirm that the rapeseeds and soybeans we use are not genetically modified - and consequently the rapeseed and soybean oil and meal derived from these seeds and beans - are not subject to the labelling requirements specified in the above-mentioned regulations.

The conventional origin of the seeds and beans we use has been contractually documented with our suppliers, and, when applicable, confirmed by analysis in the context of our implemented monitoring system. We take all necessary precautions to ensure the integrity of the conventional origin of raw materials and products during the production process.

GM Crude Soybean Oil, Meal & Hulls

GM Crude Soybean Oil, Meal & Hulls derived from genetically modified soybeans will be labelled as “produced from genetically modified soybeans”.

GM Crude Rapeseed Oil and Meal

GM Crude Rapeseed Oil and Meal derived from genetically modified rapeseeds will be labelled as “produced from genetically modified rapeseeds”.
